Writing

I've recently played a mobile game called "A strange case of Dr Jekyll and Mr Hyde" based on a novel by R.L. Stevenson, and here's my review on it.

The characters of the game are Mr Utterson, a detective, Dr Jekyll, a doctor and a chemist, his strange neighbour Mr Hyde, and some other people. Utterson, who is also a notarius, learns that, according to Jekyll's will, Hyde is going to get most of his money. But the detective finds out that Hyde is an awful man, and now he has to find out the connection of Dr Jekyll and Mr Hyde.

The game takes place in Victorian London; the locations are very detailed, and you learn a lot of interesting facts about the game while you are exploring the case of crimes and mysteries to understand who is Hyde in actual.

I strongly recommend this game to all the lovers of visual novels, and also to people who enjoyed the original novel, because this game shows it in colours and motion perfectly and close to original story.
